

# PM1 S

<b>Product code</b>	VISY PM1 SC 907 276	VISY PM1 SC ERIK 907 288
	VISY PM1 SP 907 277	VISY PM1 SP ERIK 907 289

**Product name** **PM1 Hygiene Mask for Children**

**Features** Our small sized PM1 mask is especially tailored for children and helps them maintain proper face hygiene to reduce the risk of droplet infection. Comfortable, lightweight, and fashionably designed, the PM1 hygiene mask is made from water repellent and durable materials that allow for easy breathing. Reusable and designed for prolonged wear. One universal size (S) and two colors (blue and purple). Also available with illustrations of Erik the hamster, designed by renowned Slovenian illustrator Miki Muster.

#### Technical data

**Materials** 95 % polyester Specific weight: 170 g/m<sup>2</sup>  
5 % elastane

**Colors** Blue, purple

**Sizes** S

**Packaging** Dimensions of a 10-unit packaging bag (mm): 190 x 120  
Gross weight of a 10-unit packaging bag: 30,2 g

**Manufacturer** Geoenergetika, družba za okolju prijazne energije, d.o.o.

**Warning** The PM1 hygiene mask can be used multiple times. However, it must be properly cleaned after each wear in one of the following ways:

- Applying up to 70 % alcohol solution
- Washing at 60 °C (up to five times)

If you are unable to clean the mask by one of the procedures listed above, discard it and use a new one. When worn, the curved part of the mask should be facing upwards and the mask should be turned the same way each time it is worn. If properly cleaned, the mask can be used while its outer surface still exhibits water repellent properties.

The PM1 hygiene mask helps lower the risk of infection with droplet particles by preventing touching of the facial areas. However, it does not have the capability to filter small particles, such as viruses, and is not categorized as a personal protective equipment item. For optimal protection against biohazards, always use the appropriate combination of personal protective equipment and observe appropriate safety protocols.
